### **DETAILED ACTION**

1. Applicant's addition of new claims 17-20 is acknowledged. Claims 1-20 are pending.

#### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15 and 17-20, drawn to a DNA construct encoding a protein and a *Caulobacter* surface layer protein, DNA construct and host cell.

Group II, claim(s) 16, drawn to a secretion protein.

3. Upon thorough consideration of the claims, the examiner has determined that a lack of unity of invention exists, as defined in Rule 13.

Annex B, Part 1(e), indicates the permissible combinations of different categories of claims. Part 1(e(i)) states that inclusion of an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for a use of the said product is permissible. As such, Group I combines a host cell expressing the protein of SEQ ID NO: 4 or 5 comprising a DNA construct. None of the claims are directed to a method of making or method of using the host cell. The remaining Groups are directed toward additional products and methods and lack unity of invention as indicated below.

Art Unit: 1653

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features: (1) the special technical feature of Group I is host cell expressing the sequence 4 or 5 further comprising a construct expressing a protein; (2) the special technical feature of Group II is a secreted protein. As each Group requires a special technical feature not shared with the other, they lack unity of invention.

4. With regards to the alternative amino acid sequences (SEQ ID NO: 4 and 5) listed in claim 1, the common technical feature is that the proteins are expressed by the cell; however, all alternative sequences do not share a common structure. As such, when an election is made to the claims of Group I or IV, an additional election is required as to the elected amino acid sequence (SEQ ID NO: 4 and 5).

#### ***Advisory Information***

5. A telephone call was made to Jack Brennan on January 7, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1653

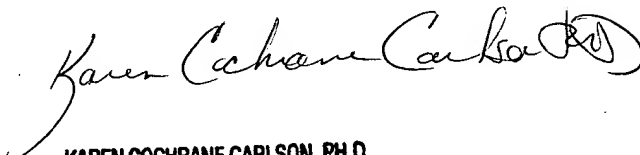

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
